PROFILE

MERN Stack Developer with hands-on experience building full-stack web applications using MongoDB, Express.js, React.js, and Node.js. Skilled in designing REST APIs, implementing authentication (JWT), integrating payment gateways, and structuring databases for real-world systems. Strong frontend foundation in React.js, Redux Toolkit, and Tailwind CSS, paired with growing backend expertise in building secure, scalable server-side logic. Seeking a full-stack role to contribute across the entire application lifecycle.

EXPERIENCE

Full Stack Developer Intern

06/2025 – Present

Scippy Technologies

- Built and shipped responsive UI components in React.js and Tailwind CSS, used across multiple pages/features of the product.
- Designed and developed REST APIs for authentication and product management, connecting them end-to-end with the React frontend.
- Worked with the database layer to support product and user data for the APIs built.
- Tested and validated API endpoints using Postman before frontend integration, reducing bugs caught later in the development cycle.
- Replaced repeated UI patterns with a reusable component library, reducing duplicate code and speeding up future feature development.
- Collaborated in a Git/GitHub workflow — branching, pull requests, and code review — alongside the existing engineering team.
- Refined UI interactions (transitions, hover states, feedback elements) to reduce friction in common user flows.

EDUCATION

BCA

06/2022 – 04/2025

University Institute of Technology (University of Kerala)

SKILLS

Frontend

HTML, CSS, JavaScript, React.js, Redux, Redux Toolkit, RTK Query, React Bootstrap, Tailwind CSS, React Hot Toast, React Toastify

Backend

Node.js, Express.js, MongoDB, JWT Authentication, REST API Design, RazorPay API Integration

Tools

Git, GitHub

CERTIFICATES

Diploma in MERN Stack

2025

LANGUAGES

- English
- Hindi
- Malayalam

PROJECTS

Denstack — Hospital Management System

MongoDB, Express.js, React.js, Node.js (MERN)

- Built a full-stack hospital management system to streamline patient records, appointment scheduling, and sub-clinic operations.
- Designed and structured the database (MongoDB) to support secure, organized storage of patient and operational data.
- Implemented sales tracking and reporting modules to improve operational visibility and efficiency.
- Built backend logic with secure data handling practices across hospital and clinic workflows.

Mpact — E-Commerce Full-Stack Application

React.js, Node.js, MongoDB, Redux Toolkit, JWT, RazorPay API

- Built a full e-commerce application with product browsing, cart, and authentication flows, using Redux Toolkit for centralized frontend state management.
- Implemented JWT-based authentication for secure user login and session handling.
- Integrated RazorPay API to support real payment processing within the checkout flow.
- Implemented parallax scroll effects and page transitions to differentiate the UI from template-based storefronts.

Base Performance

Fitness & Court Booking Platform

- Designed and built a booking interface allowing users to browse and reserve court/training slots, with a responsive layout supporting both mobile and desktop use.
- Built interactive UI states (selection, confirmation, scheduling) to guide users through the booking flow without confusion.

MRS (Movie Recommendation System)

HTML, CSS, JavaScript

Built a dynamic recommendation interface that renders personalized suggestions from a dataset/API, without relying on a framework — demonstrating core JS DOM manipulation skills.

Parallax Website

HTML, CSS, JavaScript

Built a scroll-driven car showcase site using layered parallax effects, optimized to stay smooth across screen sizes and devices.

Kerala Tourism

HTML, CSS, JavaScript

Built a multi-section tourism site with interactive navigation and layout optimized for mobile-first browsing.
